

Upgrade your VT-60 data collection tools today!

Exclusive offer to VIBROTEST 60

**READY FOR THE
NEXT GENERATION**

Import your VT-60 data with few mouse clicks!

REPORT & ROUTE MANAGER

The Report & Route Manager (ReO), version 3, allows you to migrate all of the data and route configurations in your VT-60's xms software with just a few clicks!

ReO v3 features:

- Highly efficient workflow thanks to ultra-fast data filtering and reporting
- Easy export capabilities of measurement data and cursor notations to Microsoft Excel and Word
- Compatibility with our next generation VT-80 and VP-80 instruments, replacing VT-60

**FREE 90 DAY
SOFTWARE TRIAL (*)**

NOT READY TO UPGRADE YET? TIME IS RUNING OUT...

Although our VT-60 and companion xms software has provided you with many years of reliable service, we will be discontinuing all repairs and support as of December 2020. We strongly encourage all customers to upgrade during the next 18 months to ensure your predictive maintenance program can continue uninterrupted with the full support surrounding our VT-80 / ReO package. This state-of-the-art solution has been specially engineered to offer the most convenient and seamless migration package available anywhere in the industry, ensuring your transition is not only easy, but unlocks powerful new functionality not available in our legacy VT-60/xms package.

Don't be caught unprepared – make plans to upgrade during the next 18 months. In the interim, you can assure your VT-60 is delivering trustworthy data and operating in compliance with published specifications by returning it to our factory where expert technicians will calibrate and inspect the instrument and its associated sensors.

TURN OLD INTO NEW

If you would like to make use of this trade-in special offer (**) or in case you have any further questions, please let contact us through this [link](#). We will contact you accordingly!

**The software trial is fully functional for 90 days. After expiry, the product will run with a purchased license key only.*

***Special offers are valid only during this campaign and expire after December 31, 2019.*

TRAINING VIBRATION MEASUREMENTS

On October 22-23 2019, a 2-day portable instrument product training (hard- & software) will be held in Darmstadt. If you make use of the VT-60 trade-in campaign, you can join this training against a discounted attendees fee.

Other trainings can be found on:
